

## SLJ

SLJ, TOREK, 31. 3. 2020 (2 URI)

O svoji najljubši igri ali športu zberi pomembne podatke in jih predstavi v obliki **miselnega vzorca**, ki ima naslov **MOJA NAJLJUBŠA IGRA** (naj ti pomagam ... kje se igraš, s kom, kaj potrebuješ za to igro ...).

V miselnem vzorcu vedno zapišemo **samo bistvene stvari!**

Misleni vzorec nalepi/napiši v zvezek.

Druga naloga za torek pa je:

V zvezek napiši naslov **Moja najljubša igra (šport)**.

Na kratko opiši svojo najljubšo igro ali šport. Pomagaj si z miselnim vzorcem, ki si ga prej oblikoval/-a.

## TJA

1. Če še nisi, si poglej novice tedna:

<https://www.youtube.com/watch?v=irRqm-vQiG0&t=20s>

2. Reši vajo bralnega razumevanja spodaj. Če nimaš tiskalnika v zvezek samo preriš razpredelnico s številkami od 1-6 in zraven zapiši črke NASLOVA, ki bi ustrezal posameznemu delu besedila.

## 2. naloga

**Preberi besedilo in vsakemu odstavku poišči naslov, ki najbolje izraža njegovo vsebino. Črko izbranega naslova vpiši v razpredelnico. Dva naslova sta odveč. Glej primer 0, ki je že rešen.**

### BABY SEALS GROW UP ON THE ICE

0. In February, female seals know they are going to have a baby – a seal pup. They lift themselves up onto the sea ice and stay away from the other females. When seal pups are born they are 90 cm long and weigh 10 kg. Their fur is yellowish.
  
1. The mother seal smells her newborn pup so that she remembers it. She feeds it and then dives back into the sea. She watches it from a distance. When her baby calls, she knows its cry and comes out of the sea. She smells the pup so she knows it's the right one.

2. Seal pups drink milk 6 or 7 times a day so they put on more than 2 kg every day. By their third day, their fur is all white. This thick, curly coat keeps them warm but it's not waterproof. The pups can't go into the sea yet. If they feel they are in danger, they don't move.
3. Very young seal pups cry when they are hungry but eventually their mothers don't come back. Luckily, they don't die. They have a lot of fat in their bodies but they lose a lot of weight anyway. Their lovely fur starts to fall out.
4. In time, they meet other baby seals on the ice. They make little groups and move towards the sea ice. It's beginning to melt at this time of the year. The pups watch the water, but they keep away from it.
5. Sooner or later some of the young seals jump into the sea. The others follow and soon they are all swimming. They're only 3 weeks old at this point. For the next two months, they learn to dive. They catch small fish.
6. In early June, the young seals swim north. They will travel the same way as their parents. They head for the sea around Greenland. If they meet their mothers they won't recognise them. But before they set off, they must survive the hunters on the sea ice...

(Vir: *Discovery Box*, marec 2010)

A What happens when mum goes forever?

B Taking care of a baby

C How do seal pups swim?

D Born on the ice

E Leaving their mums

F Swimming to a new place

G Starting to grow

H No family, but not alone

I Learning new things

## ŠPORT – učenke

- Sprehod in tek (poljubno izmenuj hojo in tek)

- Po sprehodu oz. teku malo zapleši ali izvedi vaje za moč (lahko tudi oboje):

## PLES:

[https://www.youtube.com/watch?v=7X8eftN2mv0&list=PLV\\_8lqZFaGdssIs0yQMTRuczv06sVQbNP](https://www.youtube.com/watch?v=7X8eftN2mv0&list=PLV_8lqZFaGdssIs0yQMTRuczv06sVQbNP)

**VAJE ZA MOČ:** (Ponovi vsaj 2-krat in bodi pozorna na pravilno izvedbo.)

<https://www.youtube.com/watch?v=dF4X0LFvjGs>

Ne pozabi na pitje vode!  
Lep dan! Učiteljica Janja

#### TIT

Nadaljujemo z obravnavo obdelave lesa, spoznali bomo načine spajanja lesenih delov v celoto (izdelek).

V učbeniku najdeš to poglavje na straneh 87 – 88.

**Tvoja naloga** je, da prebereš vsebino učnega gradiva OBDELAVA LESA – spajanje (učno gradivo najdeš v spletni učilnici) ter si vsebino zapišeš v šolski zvezek. Če imaš možnost, lahko tudi prilepiš fotografije.

#### ŠPORT – učenci

Dober dan,  
tečemo in hodimo približno 20 min, planet tv Svetovni prvak s kavča - 3. trening  
Lp, učitelj Bojan

#### GOSPODINJSTVO

Nekateri učenci ste že pridno zavihali rokave in pomagali staršem pri kuhanju. Tako sem že dobila nekaj fotoutrinkov vašega dela pri kuhanju. Če je kuhanje komu predstavljal težavo, potem vsaj **POMAGAJ STARŠEM PRI PRIPRAVI SESTAVIN ZA JEDI**; npr.: pojdi v klet po krompir, ga operi, olupi nareži; očisti zelenjavjo in jo nareži na kocke, s katerimi bo zadovoljna tudi mami/ati, sesekljaj čebulo...😊

**PO OBROKU POSPRAVI MIZO, ZLOŽI POSODO V POMIVALNI STROJ ALI JO POMIJ NA ROKE;  
POSPRAVI ČISTO POSODO V OMARE...**

Kdor pa ima željo po čisto pravem kuhanju, so tule ideje, ki so jih v prejšnjem tednu pripravili vaši sošolci. Kdo? Pokličite se in se pozanimajte... 😊

Mogoče vam zaupajo svoje recepte...

Prilagam recepte, ki sem jih našla na spletu. Vsak recept pa lahko tudi spremeniš, kaj dodaš...

Še vedno pa je dobrodošlo, če ponoviš **POVZETKE SNOVI** ob zaključku sklopov v učb., od str. 32 dalje.

Želim ti veliko uspeha pri kulinaričnem ustvarjanju, učiteljica Andreja.
